Profile

Software engineering and testing experience at DigitSapiens, alongside hands-on work in network administration, embedded systems and local AI. Founder of SpaceEagles, a startup developing two fixed-wing UAVs. Built a Raspberry Pi 5 and Hailo NPU smart-home assistant with camera-based vision, alongside Arduino CNC systems.

Technical Skills

- Programming: JavaScript, JSON, Python, C++, SQL and G-code.
- Testing: software testing, system testing, software quality and testing processes.
- Embedded systems: Raspberry Pi 5, Hailo NPU, ESP32, Arduino, GRBL, sensors, stepper and servo control.
- AI and automation: local AI processing, computer vision, pattern recognition and smart-home integration.
- Infrastructure: on-premises and cloud servers, NAS, backups, disaster recovery, networking and security.
- Engineering and data: 3D printing, CAD, circuit assembly, Power BI and database management.

Work Experience

Junior Software Engineer | DigitSapiens

Tirana, Albania | Started October 2025

- Worked with JavaScript and JSON.

Software Tester Intern | DigitSapiens

Tirana, Albania | August-October 2025

- Gained experience in software testing, system testing, software quality and testing processes.

Hotel Manager | Vila Enhalon

Struga, North Macedonia | Recurring four-month summer seasons

- Managed daily operations at the family hotel, including reservations, guest services and digital records.
- Coordinated staff schedules, housekeeping and maintenance; handled financial reporting and online guest engagement.

Network Administrator | Training Center for Management of Conflict

Skopje, North Macedonia | Part-time | September 2022-October 2024

- Maintained computers and administered on-premises and cloud servers for staff and volunteers.
- Managed NAS storage, backups, disaster recovery and network security; supported website hosting and updates.

Startup and Engineering Projects

Founder | SpaceEagles

Fixed-wing UAV startup | Two aircraft in development

instagram.com/spaceagles

- Founded a startup focused on building fixed-wing unmanned aerial vehicles.
- Developing two aircraft; both projects are currently in progress.

Local AI Smart Home and Personal Assistant

Raspberry Pi 5 | Hailo NPU | Cameras

- Built a smart-home and personal-assistant system with AI processing running locally on a Raspberry Pi 5 and Hailo NPU.
- Integrated camera-based vision, pattern recognition and learning features for assistant and smart-home functions.
- Added remote access to a personal PC to support working while away from home.

CNC Pen Plotters

Arduino Uno | Custom GRBL | G-code | March-June 2025

- Built two CNC plotters using recycled printer components and CD/DVD drive mechanisms, with stepper motors and servo-controlled pen lifts.
- Modified GRBL for pen control and used Inkscape and Universal G-code Sender for toolpaths and machine operation.

Education

Computer Engineering and Information Technology Studies

Canadian Institute of Technology (CIT), Tirana | Started October 2023

High School Diploma

ShMQSh Zef Lush Marku, Skopje | 2019-2023

Training and Badges

JavaScript Essentials 1 - Cisco | 31 January 2026

Oracle Database Administration

Generative AI - Canadian Institute of Technology (CIT)

AWS Academy Graduate - Cloud Web Application Builder - AWS training badge | 17 May 2025

Networking Essentials - Cisco | 7 July 2024

Certified Ethical Hacker (CEH) training - EC-Council | 2025

Advanced Python; Python Level I - Semos Education | 2024

Analyzing Data with Python - Semos Education | 2023

Power BI Data Analyst (PL-300); Transact-SQL - Semos Education training | 2023

Languages

Albanian (native), Macedonian (C2), English (C2), Serbian (A2-B2 across skills), German (A2).
