ABOUT ME

Software engineer with experience in JavaScript, JSON, software testing, and systems administration. Founder of SpaceEagles, where I build fixed-wing UAVs. My projects also include an on-device computer vision assistant and Arduino CNC plotters.

WORK EXPERIENCE

Junior Software Engineer | DigitSapiens

Tirana, Albania · Started October 2025

- Worked with JavaScript and JSON.

Software Tester Intern | DigitSapiens

Tirana, Albania · August–October 2025

- Worked on software and system testing, software quality, and testing processes.

Founder | SpaceEagles

Fixed-wing UAV startup · Two aircraft in development

- Building a fixed-wing UAV using the Eclipson Model B XL airframe and exploring a second aircraft.

Seasonal Hotel Manager | Vila Enhalon

Struga, North Macedonia · Recurring four-month summer seasons

- Managed reservations, guest services, staff schedules, and financial reporting at the family hotel.
- Coordinated housekeeping and maintenance and handled online guest engagement.

Network Administrator (part-time) | Training Center for Management of Conflict

Skopje, North Macedonia · September 2022–October 2024

- Maintained computers, networks, and on-premises and cloud servers.
- Managed NAS storage, backups, recovery and network security, and supported website hosting.

EDUCATION

Bachelor in Computer Engineering and Information Technology

Canadian Institute of Technology, Tirana · 180 ECTS · Awarded 2026

High School Diploma

ShMQSh Zef Lush Marku, Skopje · 2019–2023

TECHNICAL SKILLS

JavaScript, JSON, Python, C++, SQL and G-code. Software and system testing. Raspberry Pi, Hailo, Arduino and ESP32. CAD, 3D printing and CNC control. Networking, servers, NAS, backups, AWS and Power BI.

SELECTED PROJECTS

TRTL T1 | Edge-AI Personal Assistant and Smart-Space Hub

CIT thesis · Raspberry Pi 5 · Hailo NPU · ESP32 camera and sensor nodes

- Built a hub that processes camera data locally for vision, pattern recognition, and smart-home automation.
- Integrated remote access to my PC for working away from home.

Arduino CNC Pen Plotters

Arduino · GRBL · G-code · Recycled mechanisms

- Built two plotters with recycled printer parts and CD/DVD drive mechanisms. Modified GRBL for a servo-controlled pen lift.

Fully Custom 3D Printer

CIT 5th Student Conference · 8 May 2026

- Built a printer using DVD drive mechanisms and an Arduino Uno. Received a conference participation certificate.

Arduino Slot Machine

Arduino Uno · Two LCDs

- Built a tabletop prototype with two LCDs and a payout mechanism controlled by the Arduino.

TRAINING AND CREDENTIALS

Database Foundations - English · Oracle Academy / CIT · 12 February 2026

Smart and Sustainable AI Content Creation for Audio-Visual Media · CIT · CPD course completion

JavaScript Essentials 1 · Cisco Networking Academy · 31 January 2026

Certified Ethical Hacker v13 · EC-Council / Semos · Training attendance · 18 July 2025

AWS Academy Graduate - Cloud Web Application Builder · AWS Academy training · 17 May 2025

Networking Essentials · Cisco Networking Academy / CIT · 7 July 2024

Advanced Python and Python Level I · Semos Education · 2024

Analyzing Data with Python · Semos Education · 7 June 2023

PL-300 Power BI Data Analyst and DP-080 Transact-SQL · Semos / Microsoft courses · 2023
